

TRENDY

Trendy is a striking chair, for its comfort and versatility.

The thin back encloses an ergonomic lumbar support that is controlled by a practical side handles system; furthermore the seat can be equipped with an innovative micro-springs system, upon request.

Refined chrome finishes, the peculiar design of the back support and the polished aluminium base highlight the innovative character of **Trendy Plus**.

On both versions, precious contrast stitching is available upon request on leather and ecoleather coverings that give significant fashion appeal to the chair, emphasizing the formal simplicity.

The adjustable arms, available upon request, complete the ergonomic advantages of Trendy.

The 2D solution allows the height and width of the arm to be adjusted while the 4D solution also allows for adjustment of the depth and rotation of the upper part of the arm.
